WE ARE ERGONOMIC COMFORT DESIGN

4

ECD OVERVIEW BROCHURE

Since its inception in 1993, the goal of Ergonomic Comfort Design (ECD) has been to establish itself a leader in the corporate seating industry, providing premium products designed for a healthier work place. Today we have achieved this goal by following the simple principle of manufacturing our chairs with the highest level function and quality in the market.

ECD believes you should have a chair you truly love, providing you with office seating that features the latest in ergonomic technology, a variety of aesthetics, and pure comfort. We consider our user's unique needs and feedback for each purchase, matching them with the functionality, sizing, and level of cushion suited to their height, health, and body type. This new approach to corporate seating allows users to build their chair exactly as they want it, and adjust it if their needs change. Try "your chair, your way" and experience the ECD difference today.

COMPLETE BACK SUPPORT

Your back is comprised of four unique sections, each of which should be supported properly by a great chair allowing for all day comfort.

CERVICAL SUPPORT – Cervical support (headrest) can be part of an effective management of neck muscle weakness to help prevent complications of pain and injury.

THORACIC SUPPORT – ECD's thoracic foam in the upper back supports the spine between the shoulder blades, encouraging a "shoulders back" posture.

LUMBAR SUPPORT – ECD's built-in lumbar support relieves stress from your lower back muscles by ensuring you maintain proper posture even when you must remain seated for an extended period.

SACRAL SUPPORT – This is the lowest section of your spine, the section of your back that supports body weight. ECD addresses support of your sacral region with a well-molded seat with three inches of high quality, high density foam with an option of adding a layer of memory foam for additional comfort and support.

HOW ERGONOMICS AFFECT YOU

Not everything that has an "ergonomic" label is a useful product; some are poorly designed and ultimately do more harm than good. Even well-designed ergonomic products can cause problems when used incorrectly.

As the pace of change quickens in office technology and workers spend more and more hours sitting in front of a computer monitor, injuries are increasing at an alarming rate.

Over the past decade, ECD has worked closely with ergonomists, physical therapists, risk managers and health and safety consultants to create seating products that are part of the solution, not part of the problem. ECD was one of the first to install seat sliders on chairs, width and height adjustable arms, thoracic support in the back cushions, memory foam in the seat cushions and offer petite and large scale seating solutions for smaller and larger workers.

LAGOS

Lagos is our newest task seating offering. The taller back on Lagos provides both comfort and support. The Lagos' adjustable lumbar support has vertical adjustment to get in the right spot and dynamic flex to provide the perfect amount of pressure. Lagos is available with multiple seat sizes, mechanisms, arm and foam options.

AVAILABLE FEATURES

- Multiple mechanism options
- 4D arms with standard width adjustment
- Adjustable seat depth
- Contoured waterfall seat edge with reinforced inner structure
- Mesh back with adjustable lumbar support
- Multiple seat sizes to meet the needs of the 1st to 99th percentile of the population
- Resilient, molded or memory foam options
- Three cylinder height and two stool kit heights fitting multiple users and applications

VARIANT

Besides beautiful styling, superior functionality, and ergonomic comfort, Variant II is particularly distinguished by a simple and sharp design in tune with contemporary demands. Variant's synthesis of "cutting-edge design and first rate technology" will revitalize your office space.

AVAILABLE FEATURES

- All mesh comfort with optional upholstered seat
- Seat height control
- Seat depth adjustment (seat slider)
- Synchro-linked control
- Cable operated controls
- Multi-function arm rests (up, down, in, out)
- Waterfall front edge with padded foam

PURSUE

ECD's Pursue Series is a brilliant combination of design and function at an affordable price. The Pursue comes standard with an integrated lumbar support, and like most ECD seating, will be available in multiple sizes with additional options for foam, arm, and mechanisms for enhanced flexibility. Pursue will be offered in both black and grey mesh.

AVAILABLE FEATURES

- Multiple mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Contoured waterfall edge seat with reinforced inner structure
- Mesh back with adjustable lumbar support
- Mid-density, molded, or memory foam seat options

INMOTION

InMotion is a stacking or nesting flex back chair with sliding seat providing incomparable comfort and versatility. InMotion is available with or without casters and a unique flip-up arm.

AVAILABLE FEATURES

- Stackable and Nestable for versatile space saving
- Tilt function and vertebrae support back design for maximum comfort
- Flip up armrest meets multiple demands
- Sliding seat allows for comfort in multiple positions
- Removable seat cover

QT

ECD'S QT series adjusts fully to support all task-related work. Highly engineered features for seat depth adjustment, back tilt, back angle, seat height, adjustable lumbar support, and height adjustable arms are incorporated into a clean, contemporary mesh back design. When you consider comfort, quality, and value, the QT series provides a smart solution.

AVAILABLE FEATURES

- Multiple mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Contoured waterfall edge seat with reinforced inner structure
- Mesh back with adjustable lumbar support
- Mid-density, molded, or memory foam seat options

QTU

ECD's QTU Series adjusts fully to support both task and Conference Room assignments. Highly engineered features for seat depth adjustment, back tilt, back angle, seat height, adjustable lumbar support and height adjustable arms are incorporated into a clean, contemporary Upholstered Back design. When you consider comfort, quality and value, QTU series provides a smart solution.

AVAILABLE FEATURES

- Independent seat and backrest adjustment
- Multiple Mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Contoured waterfall edge seat with reinforced inner structure
- Upholstered back with six point adjustable lumbar support
- Multiple seat and back sizes to meet the needs of the 1st percentile and 99th percentile of the population
- Memory or Molded Foam
- Three cylinder heights and two stool kit heights fitting multiple users and applications

LOGIXX

Logixx was designed as a versatile task / management ergonomic chair capable of satisfying the needs of the demanding sectors of intensified workload or 24 hour continuous use. This series is offered in a standard scale fitting the 5th to 95th percentile of the population, rated to 350 pounds and for 24/7 use. Logixx has an outer poly back shell for increased durability and protection.

AVAILABLE FEATURES

- Independent seat and backrest adjustment
- Multiple Mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Fully upholstered backrest with inner-edge upholstery protection
- Contoured waterfall edge seat with reinforced inner structure
- Ratchet adjustable back height
- Poly Back Shell
- Three cylinder heights and two stool kit heights fitting multiple users and applications

METROPOLIS

Our first priority in the development of this series was to introduce a versatile task/management ergonomic chair capable of satisfying the needs of the intensified workload. ECD worked closely with Pacific Bell to create this series. Metropolis is offered in standard, large scale, and extra large scale for the above average population. Our large-scale chairs are rated at 350-pound capacity and our extra large scale chairs are rated at 450 pounds.

AVAILABLE FEATURES

- Independent seat and backrest adjustment
- Multiple mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Fully upholstered backrest with inner-edge upholstery protection
- Contoured waterfall edge seat with reinforced inner structure
- Ratchet adjustable back height
- Mid-density and memory foam seat options

QUEST

Quest is defined as a search or pursuit made to obtain something. For ECD's Quest Series, the pursuit was to create the most comfortable and ergonomic office chair in the industry. ECD developed this family of chairs to give each user unparalleled support and comfort. Each chair puts more support down the center of the back, in the thoracic area to keep the proper curvature of the spine while sitting properly upright.

AVAILABLE FEATURES

- Multiple mechanism options
- Pneumatic seat height adjustment
- Ratchet back height adjustment
- Adjustable seat depth (seat slider)
- Thoracic back foam
- Waterfall seat
- Mid-density, molded, or memory foam seat options
- Multiple arm options

TRUDEAU

The Trudeau Series captures the best features available all in one chair: memory foam seat cushion, thoracic foam back cushion, euro pivot arms that lower to allow user for easy access to the keyboard and mouse tray, and a slim, sleek European design for a great look as well.

AVAILABLE FEATURES

- Multiple mechanism options
- Pneumatic seat height adjustment
- Ratchet back height adjustment
- Adjustable seat depth (seat slider)
- Thoracic back foam
- Waterfall seat
- Mid-density, molded, or memory foam seat options
- Multiple arm options

VIVE

In a rapidly changing office environment where speed, efficiency, and comfort are essential, Vive is today's ergonomic answer. Vive offers clean, transitional design, and a soft yet supportive feel.

AVAILABLE FEATURES

- Multiple mechanism options
- Pneumatic seat height adjustment
- Ratchet back height adjustment
- Adjustable seat depth (seat slider)
- Thoracic back foam
- Waterfall seat
- Mid-density, molded, or memory foam seat options
- Multi-function arms (up, down, in, out, pivot, back and forth)

ALEXIS

Alexis is defined as a search of pursuit made in order to obtain something. For ECD's Alexis Series, the pursuit was to create the most comfortable and ergonomic office chair in the industry. ECD developed this family of chairs to give each user unparalleled support and comfort. Each chair puts more support down the center of the back, in the thorax area to keep the proper curvature of the spine while sitting properly upright.

AVAILABLE FEATURES

- Independent seat and backrest adjustment
- Multiple Mechanism options
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Thoracic back foam with lumbar support
- Multiple seat and back sizes to meet the needs of the 1st percentile and 99th percentile of the population
- Memory or Molded Foam
- Three cylinder heights and two stool kit heights fitting multiple users and applications

RENAISSANCE

The Renaissance series is an example of something good getting even better. Today the Renaissance Series, with its classic styling and plush feel, transcends to being the premier ergonomic executive family of chairs.

AVAILABLE FEATURES

- Multiple mechanism options
- Adjustable semi-loop arms that adjust vertically and horizontally
- Pneumatic height adjustment
- Adjustable lumbar support
- Seat depth adjustment (seat slider)
- Multi-dense formed high resilient foam
- Mid-density seat and back foam

TUSCANY

The Tuscany Collection by ECD boldly incorporates classic black faux leather and an extraordinary yet highly functional ergonomic design, making these office chairs a perfect executive chair or conference room chairs.

AVAILABLE FEATURES

- New generation synchronized knee tilt control with five position "anti-kick" lock
- Heavy-duty die cast base with added scuff end caps
- Molded foam on seat for extra comfort
- Contoured reinforced inner-structure with waterfall seat front

KYOS

Practical, versatile, stackable, reliable. Kyos multi-use guest and stackable seating is the perfect complement to office, school, church, and event decor.

AVAILABLE FEATURES

- Multi-density high resilient foam
- Grey or black shells
- Poly or upholstered seat or back
- Available with or without arms
- Available with or without casters
- Ganging option

MAXWELL

Office seating should be comfortable, good-looking, ergonomic, and affordable. ECD's Maxwell series is that and more. Designed for the computer-intensive user, the Maxwell series offers adjustments such as seat angle, seat height, back height, and height adjustable arms, with natural lumbar support. A durable, high-performance stool at a practical price.

AVAILABLE FEATURES

- Multiple seat mechanisms
- Back height adjustment
- Pneumatic seat height adjustment
- Thoracic back foam
- Multi-function arms (up, down, in, out, pivot, back and forth)
- Mid-density, molded, or memory foam seat options

FAST-TRACK

In a rapidly changing office environment where speed, efficiency, and comfort are essential, Fast-Track is today's ergonomic answer. Fast-Track Offers clean, transitional design and soft yet supportive feel. The Fast-Track incorporates the highly ergonomic XT control for even more adjustability at an affordable price point.

AVAILABLE FEATURES

- Adjustable back height and back angle
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Fully upholstered backrest with inner-edge upholstery protection
- Contoured waterfall edge seat with reinforced inner structure
- Manually adjustable back height
- Mid-density, molded, or memory foam seat options

EZ TASK

Like the Maxwell, the EZ Task series is designed for the computer-intensive user, offering adjustments such as back angle, seat height, back height, and height adjustable arms. This durable, high performance chair is priced practically and available in two back sizes with natural lumbar support.

AVAILABLE FEATURES

- Adjustable back height and back angle
- Adjustable arms with available width adjustment
- Adjustable seat depth
- Fully upholstered backrest with inner-edge upholstery protection
- Contoured waterfall edge seat with reinforced inner structure
- Manually adjustable back height
- Mid-density, molded, or memory foam seat options

LAB PRO

Lab Pro is a feature rich, contoured seat chair perfect for longer sits in a lab environment.

AVAILABLE FEATURES

- Full function executive control with forward tilt
- Independent back angle adjustment
- Adjustable seat depth
- Contoured seat pan with waterfall edge
- Ratchet adjustable back height
- Three cylinder height and two stool kit heights fitting multiple users and applications

LAB MINI

Lab Mini is a cost effective solution for a basic lab environment. The smaller scale and overall footprint of Lab Mini make it great for smaller spaces.

AVAILABLE FEATURES

- Two paddle control with back angle and seat height adjustments
- Knob adjustable back height
- Fully upholstered back rest
- Hard floor braking casters
- Three cylinder height and two stool kit heights fitting multiple users and applications

OUR MISSION TO STAY GREEN

Over the years, Ergonomic Comfort Design, Inc. has established its name in the office furniture market by providing one of the most comfortable, high-quality, and functional ergonomic chairs in the industry.

We also pride ourselves in our efforts of producing safer products that follow the guidelines of a cleaner and healthier indoor air quality for a better office environment.

MATERIAL SOURCING

As part of our safety process, we require a written certification from our main suppliers confirming that their components are free of harmful chemicals.

FABRIC

We have partnered with various textile companies to bring our customers options in recyclable fabrics.

MANUFACTURING

ECD uses manufacturing processes that are friendly and non-threatening to our environment. Materials used in the production process contain no Ozone Depleting Substances (ODSs), chlorofluorocarbons (CFCs), or hydrochlorofluorocarbons (HCFCs). Our systems are in full compliance with EPA requirements concerning Clean Air and Clean Water. We recycle scrap metal, paper, and corrugated waste. We work diligently with our local power company to determine effective ways to conserve energy in our operations.

WE ARE PROUD TO BE MAS CERTIFIED GREEN

WHAT IS MAS CERTIFIED GREEN?

It's impossible today to read a paper or watch a newscast and not encounter the term "green" as a metaphor for sustainability, environmental stewardship, and improved indoor air quality. MAS Certified Green is a registered trademark to delineate your low VOC emitting products in the marketplace so that purchasers and specifiers of those products know that they can earn credits in sustainability programs like LEED and the California CHP program.

WHAT IS LEED?

LEED stands for Leadership in Energy and Environmental Design

- The United States Green Building Council rating system awards LEED certification, which is the internationally accepted benchmark for the design, construction, and operation of green buildings. All ECD products can contribute toward one or more credits in the LEED for Commercial Interiors (CI) category.

WHAT DOES THIS MEAN FOR YOU?

- Our products will help you to meet your environmental goals. Even if you don't want to get LEED certification, you can rest assured that our products will make an important contribution to the quality of any work environment.

GOING BEYOND SEATING

- Delivery & Disposal
- Our chairs are shipped using reusable packaging materials such as blankets and other materials like recyclable cardboard boxes. Our chairs are designed to last well over 10 years, meaning our products limit the disposal and repurchase cycle that causes many environmental problems.
- Edison to stretch our green initiative with their Integrated Lighting Solutions program. By retrofitting our corporate office and factory with new energy efficient lighting technology, we are able to reduce our energy usage, and create a more energy efficient work environment.

CUSTOMIZING YOUR CHAIR

There are many ways to make your chair, your way. Below are some of the standard options we offer for most of our seating. If there is anything else you would like to see on your chair, don't hesitate to ask. Chances are, we will be able to accommodate your needs.
